

Wind Engineering and Building Regulation

Lam Pham¹

¹CSIRO, Lam.Pham@csiro.au

1 ABSTRACT

This presentation provides an overview of Australian building regulation system including the scope the Building Code of Australia (BCA), its relationship with Australian Standards and the process for changing the BCA provisions. It then describes some wind engineering related projects that the Australian Building Codes Board is currently involved with. These include a consultation regulation impact statement on 'Proposal to Revise Building Code of Australia requirements for Construction in Cyclone Affected Regions' and current effort to create tools to assist with policy making decision for climate change adaptation.
